Oral surgery is a term that encompasses a range of treatments offered by dentists, oral surgeons and oral and maxillofacial surgeons. Maxillofacial means relating to the jaw or face. Routine surgical procedures such as tooth removal can be carried out by your general dentist, but you may be referred to a specialist oral surgeon for more complex treatments like wisdom tooth removal or dental implants.

Oral Surgery Treatment Options | Bupa Dental Care UK

Oral surgery refers to any medical procedure performed on the mouth with specific regard to the teeth, jaw, and/or gums. Depending on the type of procedure being performed, it may be done by your general dentist in their office (a tooth extraction, for example), or by an oral surgeon in a hospital or clinic setting (such as the removal of wisdom teeth or dental implants, depending on the type of implant and the technique being used).
