Potentiometers are measured in ohms like resistors, but rather than having color bands, they have their value rating written directly on them (i.e. "1M"). They are also marked with an "A" or a "B," which indicated the type of response curve it has. Potentiometers marked with a "B" have a linear response curve.

Typically within solid state relays, the LED light or infrared source and the optical triac are contained within the same package, sufficient isolation being provided to withstand high voltages which may extend to hundreds of volts or possibly even more. Solid state relays come in many forms, but those used for AC switching may use a triac.
