Blue force tracking (BFT) systems consist of a computer, used to display location information, a satellite terminal and satellite antenna, used to transmit location and other military data, a Global Positioning System receiver (to determine its own position), command-and-control software (to send and receive orders, and many other battlefield support functions), and mapping software, usually in the form of a geographic information system (GIS), that plots the BFT device on a map.

Blue force tracking - Wikipedia

Blue Force Tracking (BFT) describes a GPS-enabled system that provides military commanders and forces with location information of both friendly (blue) and hostile (red) forces. Such systems typically include a computer, satellite terminal, satellite antenna, GPS receiver, command and control software, and mapping software.
