It can be applied to the assessment of soil quality, aggregates and most man-made materials such as slags. Specifically, BS 1377-3: Standardizes the methods used in current practice. Formalizes the use of modern chemical analytical methods. Provides a single source for the methodology for chemical testing for civil engineering purposes. Integrates analytical laboratories into chemical testing for civil engineering purposes, in particular methods of sample preparation.

BS 1377-3:2018 Methods of test for soils for civil ...
This Part of BS 1377 describes in-situ methods of test on soils for civil engineering purposes, i.e. tests made directly on the soil in place as distinct from laboratory tests. The methods for test have been arranged in groups either according to the purpose of the test or the mode of execution. These groups are as follows. • Two methods for the determination of the in-situ corrosivity characteristics.
