Communicable
Communicable diseases
are community
problems, which can
devastate whole
populations, in both
developing and
developed countries.
Epidemiology is the
science of communities
that looks at many
individuals to try and
discover common
features in them. From
this analysis the cause

The ' Global Public Good ' (GPG) concept has been suggested as a framework to address this mismatch in different areas of public policy. This paper

Acces PDF Communicable

considers the application of the GPG concept as an organizing principle for communicable disease control (CDC), considering in particular its potential to improve the health and welfare of the developing world.
