using Excel = Microsoft.Office.Interop.Excel; using System.Reflection; Test the Automation Client. Press F5 to build and to run the program. Click Button1 on the form. The program starts Excel and populates data on a new worksheet. When you are prompted to enter quarterly sales data, click Yes.

~~How to automate Microsoft Excel from Microsoft Visual C#~~

Examples Example 1. This example is from the video above, and uses a simple XLOOKUP to look up a country name, then return its telephone country code. It only includes the lookup_value (cell F2), lookup_array (range B2:B11), and return_array (range D2:D11) arguments. It does not include the match_mode argument, as XLOOKUP defaults to an exact match.
