Like most any other pinball machine
manufactured, Gottlieb® System 1 games use
batteries to supply power to the non-volatile
RAM memory. Certain game settings, high score
thresholds (including high score to date),
audit information, and bookkeeping
information are all options which are saved
when the game is powered off.

Gottlieb System 1 - PinWiki

BriefHistory of Gottlieb System 1 Pinball Machines. TheGottlieb System 1 pinball machines are an interesting mixture of bothgreat mechanical design and poor electronics design. Gottlieb was late getting into the solid state era of pinballmachines. Both Bally and Williams had at least a 2 year headstart on designing their own solid state pinball control systems.

Gottlieb was last to introduce a solid-state system, and last to cease manufacture of electromechanical games. The first version of Gottlieb's solid state pinball hardware was called System 1, and had many undocumented features. Designed and developed by Rockwell International's Microelectronics Group of Newport Beach, CA with circuit board ...
