great French

Like all transforms, the  
Laplace transform  
changes one signal into  
another according to  
some fixed set of rules or  
equations. The best way  
to convert differential  
equations into algebraic  
equations is the use of  
Laplace transformation.

The Laplace Transform is derived from Lerch ' s Cancellation Law. In the Laplace Transform method, the function in the time domain is transformed to a Laplace function in the frequency domain. This Laplace function will be in the form of an algebraic
